# Graphic Design Intern for FDA's Center for Medical Devices and Radiological Health

Project Title	Graphic Design Intern for FDA's Center for Medical Devices and Radiological Health
Cummary	Create compelling visuals for both print and online media to help promote and protect the public health. These messages will be used to promote information on medical devices and radiological health to patients, health care providers, and other key audiences.
Country	United States

### **Project Description**

We're looking for a graphic designer with experience in Adobe graphic design software to assist in enhancing textual communication with eye-catching visuals. Graphics will be used to strengthen external public health messages to the public and internal messages to staff. This will be done through the creation of graphics created for print, digital static images, GIFs, and infographics while following FDA Visual Identity standards.
